

Developer Rayhan

Full Stack Web Developer | Python Django, React.js, Next.js & REST APIs

📍 Faridpur, Dhaka, Bangladesh 📞 +8801329905035 @ iamdeveloperrayhan@gmail.com

◦ Profiles ◦

 [iamdeveloperrayhan](#)

 [iamdeveloperrayhan](#)

◦ Summary ◦

Full Stack Web Developer with hands-on experience in building responsive, scalable, and user-friendly web applications using Python, Django, React.js, and Next.js. Skilled in HTML, CSS, JavaScript, REST APIs, and PostgreSQL, with a strong understanding of both frontend and backend development. Passionate about writing clean, maintainable code and developing efficient solutions to real-world problems.

◦ Interests ◦

Web Development

Full Stack Development, Frontend, Backend, Web Applications, Modern Web Technologies

Software Development

Software Engineering, Application Development, Clean Code, Scalable Solutions

Programming & Coding

Python, JavaScript, C++, Problem Solving, Algorithms, Programming

Learning New Technologies

Technology Trends, Continuous Learning, Modern Frameworks, New Tools, Technical Growth

Open Source

Projects

Django E-Commerce Website

A full-featured Django eCommerce web application with user authentication, product catalog, shopping cart, order management, and responsive design.

Jun — 2026

This project is a complete **Full Stack E-Commerce Web Application** built using the **Django Framework** with a modern, responsive, and user-friendly interface.

The application allows customers to browse products, add items to their shopping cart, place secure orders, complete online payments through **Stripe**, and manage their accounts with ease.

The project follows a modular Django architecture by separating functionalities into multiple reusable apps, making the code clean, scalable, and easy to maintain.

Every sensitive configuration such as API Keys, Database Credentials, and Django Secret Keys are securely managed using a **.env** file.

python, Django, CSS3, HTML5, JavaScript, Stripe, Web Application, Django Framework, bootstrap

Nexus Explorer

A read-only React dashboard for the Rick and Morty API — built with Hooks, React Router, Context API, and TanStack React Query. Live search, filters, watchlist, and character compare, all in a custom design system.

Aug — 2026

Nexus Explorer is an internal-style research console for browsing a large public character database. It's a **100% client-side, read-only** application — there is no backend, no database, and no create/update/delete anywhere in the project. Every byte of data on screen is fetched live from the public [Rick and Morty REST API](#).

The goal of this project was to build a production-shaped React application that correctly demonstrates:

- Idiomatic use of every core React Hook (useState, useEffect, useRef, custom hooks)

Open Source Projects, GitHub, Collaboration, Code Contribution, Community

Problem Solving

Logical Thinking, Debugging, Algorithms, Analytical Thinking, Technical Solutions

Technology & Innovation

Emerging Technologies, Innovation, Software Solutions, Tech Trends, Digital Transformation

Building Real-World Projects

Project Development, Practical Applications, Full Stack Projects, Real-World Solutions

◦ Skills ◦

Python

Proficient in Python for backend development, application logic, automation, and problem-solving.

Python, Backend Development, Scripting, Problem Solving

Django

Experienced in developing secure and scalable web applications using Django and its core features.

Django, Python, Web Development, MVC/MVT, Backend

Django REST Framework

Skilled in building and integrating RESTful APIs using Django REST Framework.

DRF, REST API, Serializers, ViewSets, Routers, API Development

React.js

Experienced in developing interactive and reusable user interfaces using React.js and modern component-based architecture.

React.js, Components, Hooks, JSX, Frontend Development

Next.js

Skilled in building modern, responsive, and

- Real-world client-side routing with nested routes, dynamic segments, and query-string-driven state
- A modular, performance-conscious Context API architecture
- Server-state management with **TanStack React Query** — caching, background sync, prefetching, and useEffect + fetch as a manual contrast

context-api, css3, custom-hooks, dashboard, frontend, frontend-project-for-beginners, javascript, react, react-hooks, react-query, react-router, react-router-dom, reactjs, rest-api, rick-and-morty-api, single-page-application, spa, tanstack-query, vite, web-development

Django E-Commerce Frontend

A responsive eCommerce frontend built with Django templates, HTML, CSS, Bootstrap, and JavaScript. This project focuses on the user interface and does not include backend functionality.[bestwebcreator.com](#)

Nov — 2024

This project is a modern and responsive **E-Commerce Frontend Website** developed using **Bootstrap, HTML, CSS, and JavaScript**.

It focuses on creating a clean shopping experience with responsive layouts and user-friendly design.

Note: This repository contains only the frontend (UI). Backend functionality such as authentication, database operations, payment processing, and order management is not included.

bootstrap5, css, ecommerce, frontend, html, javascript, responsive-design, ui-, ui-design, web-development

Hospital Appointment Management API

A RESTful API for managing hospital appointments, patients, doctors, schedules, and healthcare services built with Django REST Framework.

Jul — 2026

Hospital Appointment Management API is a production-ready backend system built with **Django REST Framework**.

The project provides a complete RESTful API for managing hospital appointments, doctors, patients, billing, authentication, and dashboard analytics.

It follows secure authentication using JWT and role-based authorization for Admin, Doctor, and Patient.

performance-focused web applications using Next.js.

Next.js, App Router, Server Components, Client Components, Routing

JavaScript

Strong understanding of JavaScript for developing dynamic and interactive web applications.

JavaScript, ES6+, DOM, Async/Await, Promises, API Integration

REST API

Experienced in designing, developing, consuming, and integrating RESTful APIs between frontend and backend applications.

REST API, RESTful Services, HTTP, JSON, API Integration, CRUD

JWT Authentication

Experienced in implementing secure user authentication and authorization using JSON Web Tokens.

JWT, Access Token, Refresh Token, Authentication, Authorization, Security

PostgreSQL

Skilled in managing relational databases and designing efficient data structures using PostgreSQL.

PostgreSQL, SQL, Relational Database, Queries, Database Design

SQL

Strong understanding of SQL for querying, managing, and manipulating relational database data.

SQL, SELECT, JOIN, GROUP BY, ORDER BY, CRUD, Queries

Tailwind CSS

Skilled in building modern and responsive user interfaces efficiently using Tailwind CSS utility classes.

Tailwind CSS, Utility-First CSS, Responsive Design, UI Development

The architecture is modular, clean, scalable, and follows REST API best practices.

Project Highlights

JWT Authentication

Role Based Access Control

Doctor Management

Patient Management

Appointment Booking

Billing System

Dashboard Analytics

Search

Filtering

Ordering

Pagination

Profile Management

Password Reset

Custom Middleware

Request Validation

RESTful API Design

api, appointment-system, authentication, backend, django, django-rest-framework, drf, healthcare, hospital-management, jwt, postgresql(remove), postgresql, python, rest-api, sqlite3

Education

Faridpur Polytechnic Institute

Computer Science

3.89

Diploma

2023 — Present

Currently pursuing a Diploma in Computer Science with a strong interest in software and web development. Throughout my studies, I have developed a solid foundation in programming, web technologies, and problem-solving. With a particular passion for web development, I have advanced my skills in modern frontend and backend technologies and progressed toward becoming a Full Stack Web Developer within my department.

Faridpur Technical Training Center

Electrical Maintenance And Work

GPA-5

Git & GitHub

Experienced in using Git for source code management, version control, branching, and maintaining development history. Experienced in managing, documenting, and collaborating on software projects using GitHub.

Git, Version Control, Branching, Merging, Repository, GitHub, Collaboration, Pull Request

Object-Oriented Programming (OOP)

Applying OOP principles to create modular, reusable, and maintainable software solutions.

OOP, Classes, Objects, Encapsulation, Inheritance, Polymorphism

Responsive Web Design

Skilled in creating web applications that provide a consistent user experience across desktop, tablet, and mobile devices.

Responsive Design, Mobile-Friendly, Media Queries, Flexbox, CSS Grid

C++

Strong foundation in C++ programming with knowledge of object-oriented programming and problem-solving.

C++, OOP, Programming, Problem Solving, Algorithms

Postman

Skilled in testing, debugging, and validating REST APIs using Postman.

Postman, API Testing, REST API, HTTP Requests, Debugging

Frontend-Backend Integration

Skilled in connecting frontend applications with backend services through REST APIs and handling application data flow.

API Integration, React, Django, REST API, JSON, Full Stack Development

Vocational

2021 — 2023

Studied Electrical Maintenance and Work before pursuing a Diploma in Computer Science. Gained foundational knowledge of electrical systems, wiring, maintenance, troubleshooting, and electrical safety through academic and practical learning. This experience helped develop my technical skills, problem-solving ability, and hands-on approach to working with technical systems.

Languages

Bengali (Bangla)

Native language with excellent speaking, reading, and writing proficiency.

English

Good working proficiency with strong communication, reading, writing, and comprehension skills.

Chinese (Mandarin)

Basic conversational knowledge with the ability to understand and use common words and phrases.

Volunteering

MUN Alert

Dhaka, Dhaka District, Bangladesh
Dhaka, Dhaka District, Bangladesh

Nov— 2025

MUN Alert is a platform focused on helping find and rescue missing children in Bangladesh. It allows people to report missing or found children, share important case information, and helps connect the public with the relevant authorities for faster recovery. The platform also focuses on child safety, privacy, and quick alerts.
